The crafty Ferdinand, or Fernando, represents his wife's death, and realizing that if Juans succeeded her as Queen of Castile, while he still reigned over Aragen, Spain would run the risk of being again divided into two hostile kingdoms, saw only one way of peace, namely, by sacrificing his daughter. To insure his object, he first charged her with heresy, and next with insanity. From girthood, says the London Atheneum, from which we condense these facts, Juana had been pious, but her piety was not of the fashion most liked in Spain. Say in answer. She better defended her conduct nor changed her confessor. Philip was not much of a bigot; he seems to have respected, and even to have leved, his wife; but he was poor in purse, fond of show, devoted to pleasure, and longing to thrust his hands into the teeming coffers of Castile.
